Subject: Low Carbon Economy Trust

Hi Prof. Potvin

The Liberal Party released its [full election platform](#) this week and MP John McKay asked that I bring the planned 'Low Carbon Economy Trust' to your attention.

A Liberal government would partner with the provinces and territories to create a \$2-billion trust that will provide funding for projects that materially reduce carbon emissions under a new pan-Canadian climate change framework. \$1-billion in federal funding would be contributed in 2017, and another \$1-billion would be contributed in 2018. Eligible projects will be determined in consultation with the provinces and territories.

Mr. McKay plans on attending tomorrow's Acting on Climate Change book launch at Hart House.

Best,

Chris
